PROJECTS

Spotify-Clone

- Developed a web-based Spotify clone using HTML, CSS, and JavaScript, showcasing creativity and front-end development skills.
- Implemented features such as user authentication, playlist management, and real-time updates to mimic the functionality of the original Spotify application.

Bubblegum Game

- Created an interactive game using HTML, CSS, and JavaScript, demonstrating proficiency in DOM manipulation and user interface design.
- Designed game mechanics, graphics, and animations to provide an engaging and enjoyable user experience.

Code-dev

- Designed a responsive homepage for a coding website using HTML and CSS, highlighting skills in web design and development.
- Ensured cross-browser compatibility and mobile responsiveness to cater to a wide range of users.
